Att: Sustainable Water Strategies Branch
Department of Sustainability & Environment
Office of Water
P.O. BOX 500
East Melbourne 3002

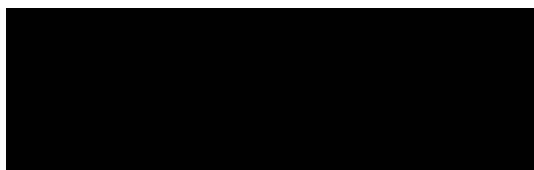

Dear Sirs,

North-South Pipeline

It is obvious that the premature implementation and fast tracking of this disastrous concept has nothing whatever to do with sustainable water strategy.

At the very least, this whole project should be halted until the enquiry results are obtained from the Environment and Natural Resources Committee. There are many other options available to Melbourne to supplement it's water supply rather than piping at enormous greenhouse gas cost, water which is desperately needed in the north.

Yours faithfully,

Maggie Anderson
