

Victoria's North and Murray Water Resource Plan

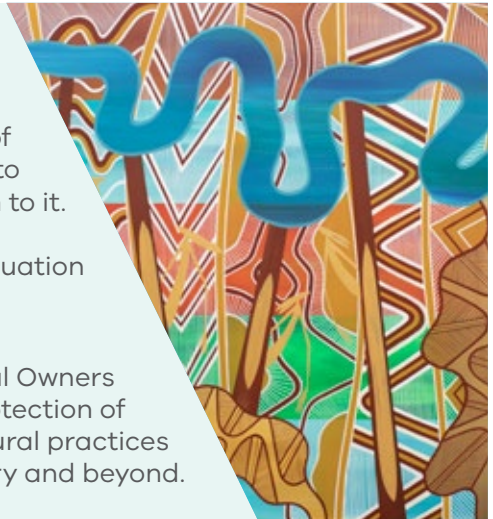

Comprehensive Report

Acknowledgment

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it. We honour Elders past and present whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

We are committed to genuinely partner, and meaningfully engage, with Victoria's Traditional Owners and Aboriginal communities to support the protection of Country, the maintenance of spiritual and cultural practices and their broader aspirations in the 21st century and beyond.

Accredited Text

The substantive components of the accredited Victoria's North and Murray Water Resource Plan will be identified in this document as follows:

Sample accredited text

<<end of accredited text for s10.49(1) of the Basin Plan>>

The accredited text is Victoria's response to each requirement of Chapter 10 of the Basin Plan and is contained in Victoria's North and Murray Index table attached here (see Accredited Text Table). The remaining content of this document is supplementary to Victoria's North and Murray Water Resource Plan and is intended to explain and give context to the text that is accredited for Basin Plan purposes.

Victoria's North and Murray Index Table	iv
1. Introduction: Victoria implementing the Basin Plan	2
1.1 The Murray-Darling Basin Plan	2
1.2 Water resource plans	3
1.3 Sustainable Diversion Limits	4
1.4 Victoria's approach to Victoria's North and the Murray Water Resource Plan	8
1.4.1 A single water resource plan for Victoria's North and Murray regions	9
1.4.2 A 'water source' basis	9
1.4.3 Drafting water resource plans	10
1.5 Accreditation and compliance	10
1.6 Consultation	11
1.6.1 Who else is involved?	11
1.6.2 Water security and risk analysis	12
1.7 Water resource plan review process	13
2. Victoria's North and Murray water resource plan area	18
2.1 Basin Plan SDL resource units for Victoria's North and Murray Water Resource Plan	18
2.2 Surface water boundaries	20
2.2.1 Victorian Murray water resource plan area	20
2.2.2 Northern Victoria water resource plan area	21
2.3 Groundwater boundaries	21
2.3.1 Goulburn-Murray water resource plan area	21
2.3.1.1 Water supply protection areas	23
2.3.1.2 Groundwater management areas	23
3. Landscape, people and economy	28
3.1 Features of Victorian Murray water resource plan area	28
3.1.1 Topography	28
3.1.2 Rainfall distribution	29
3.1.3 Geology, soils and land use	29
3.1.4 Economic contribution	30
3.1.5 Traditional Owners	30
3.1.6 Population and towns	30
3.1.7 Recreation and community values	31
3.1.8 Environmental assets and features	31
3.1.8.1 River Murray Basin	31

3.1.9	Urban water distribution systems	33
3.2	Features of the Northern Victoria water resource plan area	36
3.2.1	Topography	36
3.2.2	Rainfall distribution	36
3.2.3	Geology, soils and land use	36
3.2.4	Economic contribution	36
3.2.4.1	Ovens Basin	37
3.2.4.2	Broken Basin	37
3.2.4.3	Goulburn Basin	37
3.2.4.4	Campaspe Basin	37
3.2.4.5	Loddon Basin	38
3.2.5	Traditional Owners	41
3.2.6	Population and towns	41
3.2.7	Recreation and community values	41
3.2.8	Environmental assets and features	42
3.2.8.1	Ovens River Basin	42
3.2.8.2	Broken Basin	42
3.2.8.3	Goulburn Basin	43
3.2.8.4	Campaspe Basin	43
3.2.8.5	Loddon Basin	43
3.2.9	Urban water distribution systems	44
3.3	Groundwater	48
4.	Water resources	52
4.1	Managing water resources: types of water resource supply systems	52
4.1.1	Unregulated surface water systems	52
4.1.2	Regulated surface water systems	53
4.1.3	Groundwater systems	57
4.1.4	Having regard to connectivity	58
4.2	Victorian Murray water resource plan area	63
4.2.1	Victorian Murray Basin (SS2)	63
4.2.1.1	Land and stream network	64
4.2.1.2	Rainfall and surface hydrology	64
4.2.1.3	Entitlements and diversions	65
4.2.1.4	Environmental assets and water for the environment	67
4.2.2	Kiewa Basin (SS3)	67
4.2.2.1	Land and stream network	68
4.2.2.2	Rainfall and surface hydrology	68
4.2.2.3	Entitlements and diversions	69
4.2.2.4	Environmental assets and water for the environment	69
4.2.3	Murray irrigation areas	69

4.2.3.1	Land and stream network	70
4.2.3.2	Rainfall and surface hydrology	70
4.2.3.3	Entitlements and diversions	71
4.2.3.4	Environmental assets and water for the environment	71
4.2.4	Significant surface water connections in the Victorian Murray water resource plan area	71
4.2.4.1	Significant connections between water resource plans	71
4.2.4.2	Significant connections between SDL resource units	71
4.2.4.3	Significant connections between surface water and groundwater	72
4.2.4.4	Other non-significant connections	72
4.3	Northern Victoria water resource plan area	72
4.3.1	Ovens Basin (SS4)	72
4.3.1.1	Land and stream network	73
4.3.1.2	Rainfall and surface hydrology	73
4.3.1.3	Entitlements and diversions	74
4.3.1.4	Environmental assets and water for the environment	75
4.3.2	Broken Basin (SS5)	75
4.3.2.1	Land and stream network	76
4.3.2.2	Rainfall and surface hydrology	76
4.3.2.3	Entitlements and diversions	76
4.3.2.4	Environmental assets and water for the environment	77
4.3.3	Goulburn Basin (SS6)	78
4.3.3.1	Land and stream network	78
4.3.3.2	Rainfall and surface hydrology	78
4.3.3.3	Entitlements and diversions	79
4.3.3.4	Environmental assets and water for the environment	81
4.3.4	Campaspe Basin (SS7)	82
4.3.4.1	Land and stream network	83
4.3.4.2	Rainfall and surface hydrology	83
4.3.4.3	Entitlements and diversions	84
4.3.4.4	Environmental assets and water for the environment	85
4.3.5	Loddon Basin (SS8)	85
4.3.5.1	Land and stream network	86
4.3.5.2	Rainfall and surface hydrology	87
4.3.5.3	Entitlements and diversions	88
4.3.5.4	Environmental assets and water for the environment	89
4.3.6	Significant connections in the Northern Victoria water resource plan area	89
4.3.6.1	Significant connections between water resource plan areas	89
4.3.6.2	Significant connections between SDL resource units	90
4.3.6.3	Significant connections between surface water and groundwater	90
4.3.6.4	Other non-significant connections	91
4.4	Goulburn-Murray groundwater basin/water resource plan area	93
4.4.1	Upper Murray groundwater catchment	96

4.4.2	Ovens groundwater catchment	96
4.4.3	Goulburn Broken groundwater catchment	97
4.4.4	Campaspe groundwater catchment	97
4.4.5	Loddon groundwater catchment	98
4.4.6	Significant groundwater connections in the Goulburn-Murray water resource plan area	98
5.	Challenges for water planning, management and use (the risk assessment)	104
5.1	Victoria’s approach to the risk assessment	104
5.1.1	Conducting the risk assessment	104
5.1.1.1	Assessing risks – causes, threats and uses of water	105
5.2	Risks identified in the water resource plan areas	108
5.2.1	Description of risks	110
5.3	Summary – Northern Victorian water resource plan area (surface water)	111
5.3.1	Water availability	111
5.3.2	Water quality (condition)	114
5.3.3	Social (recreational and amenity) and Aboriginal uses	120
5.3.4	Environmental uses	120
5.4	Summary - Victorian Murray water resource plan area (surface water)	123
5.4.1	Water availability	123
5.4.2	Water quality (condition)	126
5.4.3	Social (recreational and amenity) and Aboriginal uses	130
5.4.4	Priority environmental assets	130
5.5	Summary – Goulburn-Murray water resource plan area (groundwater)	132
5.5.1	Water availability	132
5.5.2	Water quality (condition)	134
5.5.3	Social (recreational and amenity) and Aboriginal uses	134
5.6	Strategies for addressing medium and higher-level risks	135
5.6.1	Surface water risks	136
5.6.2	Groundwater risks	136
5.7	Managing compliance risks - the Basin Compliance Compact	137
5.8	Updates to original Risk Assessment for inter valley transfers	138
5.8.1	Identifying Inter-Valley Transfer risks in the Risk Assessment	139
5.8.1.1	2016 Risk Assessment scenario	139
5.8.1.2	2018 Risk Assessment Scenario	139
5.8.1.3	Identifying threats to priority environmental assets	140
5.8.2	Overview of 2018 risk assessment updates	140
6.	Victoria’s water institutions and their functions	146
6.1	Overview	147

6.2	The Minister	148
6.2.1	Issuing authorisations to take and use water	148
6.2.2	Limits on issuing new entitlements	149
6.3	Water corporations	150
6.3.1	Urban Water Corporations	150
6.3.2	Rural Water Corporations	151
6.3.2.1	Goulburn-Murray Water	152
6.3.2.2	Lower Murray Water	153
6.3.2.3	Coliban Water	153
6.3.2.4	Grampians Wimmera Mallee Water	153
6.4	Catchment management authorities	153
6.5	Victorian Environmental Water Holder	155
6.6	The storage and resource managers	155
6.6.1	The storage manager	155
6.6.2	The resource manager	156
6.6.3	Making seasonal determinations	156
6.7	Compliance and enforcement functions	156
6.7.1	Metering and monitoring compliance	158
6.7.2	Compliance and enforcement strategy	158
6.7.3	Reporting requirements	159
6.7.4	Education programs	159
6.7.5	Complementing Murray-Darling Basin Authority enforcement	159
6.7.5.1	Autonomy and referrals	160
7.	Victoria's water access and trading framework	164
7.1	Victorian water entitlement framework	164
7.2	Water rights and entitlements	165
7.2.1	Statutory rights	169
7.2.1.1	Domestic and stock rights	169
7.2.1.2	Traditional Owner rights	170
7.2.2	Water entitlements	170
7.2.2.1	Bulk and environmental entitlements	171
7.2.2.2	Individual arrangements for access to water	173
7.2.2.3	Other supply arrangements	175
7.2.2.4	Above cap and system water	176
7.2.2.5	Specific water access arrangements under entitlements	177
7.2.3	Protecting entitlement reliability	178
7.2.3.1	Qualification of rights	180
7.3	Water markets and trade	182
7.3.1	Market design and rules	183

7.3.2	The Victorian Water Register	185
7.4	Water Markets and the Basin Plan	187
7.4.1	Surface water trade requirements for Basin Plan	187
7.4.2	Groundwater trade requirements for Basin Plan	187
7.4.2.1	Assessing groundwater trade	188
7.4.2.2	Sufficient hydraulic connectivity in Victoria’s North and Murray water resource plan	191
7.4.2.3	Resource condition limits	192
7.4.2.4	Accounting for trade	192
7.4.2.5	Maintaining characteristics of the what is traded	192
7.4.2.6	Managing impacts on third parties	193
7.4.2.7	Basin Plan considerations before approving groundwater trade	196
7.4.2.8	Trade within a groundwater SDL resource unit	198
7.4.2.9	Trade between two groundwater SDL resource units	200
7.4.2.10	Trade between surface water and groundwater SDL resource units	201
8.	Aboriginal water values and uses	208

8.7 Consultation.....	340
9. Sustainable diversion limits.....	344
9.1 Basin Plan requirements.....	344
9.2 What are baseline diversion limits (BDLs) and sustainable diversion limits (SDLs)?.....	345

9.2.1	Cap reporting framework	345
9.2.2	Basin Plan reporting framework	345
9.2.3	BDLs and SDLs for Victoria’s North and Murray Water Resource Plan	346
9.3	Complying with SDLs	350
9.3.1	What is permitted take and actual take?	350
9.3.2	Annual determinations of permitted take	352
9.3.2.1	Surface water	352
9.3.2.2	Groundwater	352
9.3.2.3	Accounting for water availability	353
9.3.3	Ensuring actual take does not exceed permitted take	353
9.3.4	Non-compliance with SDLs	355
9.4	Limits on certain forms of take	355
9.4.1	Take under basic rights	357
9.4.2	Take by runoff dams	357
9.4.3	Net take by commercial plantations	358
9.5	Improved certainty in estimating and measuring take	358
10.	Extreme events and critical human water needs	362
10.1	Basin Plan Requirements	362
10.2	Extreme events in the risk assessment	364
10.3	Extreme event management	369
10.3.1	Managing a water shortage	369
10.3.1.1	Managing domestic and stock supply	369
10.3.1.2	Victoria’s water planning framework	370
10.3.1.3	Urban water planning	371
10.3.1.4	Impact on the environment during a water shortage	371
10.3.2	Statutory powers – restricting use	373
10.3.3	Management of the River Murray during extreme dry periods	375
10.3.4	Management of water resources during an extreme water quality event	377
10.3.4.1	Roles and responsibilities	378
10.3.4.2	Impact on drinking water	381
10.3.4.3	Impacts on other uses	381
10.3.4.4	Impact on the environment	381
10.3.5	Measures to meet critical human needs	382
10.4	New scientific information	383
11.	Interception	386
11.1	Basin Plan requirements	386
11.2	Interception in the risk assessment	387
11.3	Addressing risks to water resources from interception	389

11.3.1	Runoff dams	389
11.3.2	Land use changes	390
11.3.3	Earth resources development	390
11.3.4	Monitoring potential interception activities	390
11.4	Potential interception in Victoria’s North and Murray water resource plan area	391
11.4.1	Farm dams in Victoria’s North and Murray water resource plan area	394
11.4.1.1	Number and capacity of runoff dams	394
11.4.1.2	Take by runoff dams	396
11.4.1.3	Future growth in runoff dams	397
11.4.1.4	Future monitoring	397
11.4.1.5	Comparison with risk assessment	398
11.4.1.6	Methods for estimating take	399
11.4.1.7	Take by runoff dams excluding basic rights	400
11.4.2	Take by runoff dams under basic rights	400
