

Broken System Review Project Steering Group

The Broken System Review is being led by a Project Steering Group which will provide the Minister for Water with its final recommendations for the future management of the Broken system by June 2021.

The group comprises seven water share holders from across the Broken system (Neil Renshaw, Ian Muller, Trevor Stedman, Maureen Cottam, Wayne Spinks, Mark Foletta and Tim Stokes) the Chair of the Goulburn-Broken Water Services Committee (Craig Madden), and a representative from Goulburn-Murray Water (Andrew Shields), North East Water (John Day), the Victorian Environmental Water Holder (Keith Chalmers) and the Goulburn-Broken Catchment Management Authority (Simon Casanelia). The group is being supported by an independent facilitator and representatives from the Department of Environment, Land, Water and Planning.
